

## CONTAMINATION WARRANT

Prior to return for repair, shipment, exchange, inspection, disposal, or service, Avon Protection Systems requires that all equipment and materials must be certified as safe to handle without personal protective equipment. Said certification of safe handling must be completed by an appropriate authority at the organization returning the equipment. Appropriate authorities must have both the knowledge to identify potential hazards and the authority to sign such documents on behalf of the organization.

### Administrative Information:

|                      |      |                        |     |
